

ENVIRONMENT POLICY

Quantum is committed to caring for and protecting the environment and will continually strive to minimise the impact of our activities, prevent pollution and improve our environmental performance.

Quantum will comply with, and where possible exceed, relevant Environmental legislation and regulations and other obligations imposed on the company.

This Policy applies to all building and civil engineering construction sites controlled by Quantum and the activities carried out on these sites. It also applies to temporary site offices, head office at Swansea, Plant company and all regional offices.

As a company, we aim to reduce our Environmental impact through:

- Assessing and minimising negative Environmental impacts, and where possible, maximising positive impacts of our operations;
- Operating and implementing an Environmental Management System accredited to ISO 14001;
- Implementing a process of continual improvement;
- Reducing our local impacts and effects of noise, air quality, disturbance and inconvenience;
- Reducing waste and minimising waste to landfill by the promotion of resource efficiency and compliance with the waste hierarchy;
- Where possible, ensuring the use of sustainable resources;
- Ensuring the efficient use of energy and water resources;
- Protecting biodiversity and ecosystems;
- Setting and reviewing environmental objectives and targets;
- Committing to work with others including clients, suppliers and sub-contractors to minimise the impact of our operations on the environment;
- Promoting high environmental standards and the use of environmental best practice throughout the business;
- Providing training to employees on environmental issues

This policy is compatible with the principles adopted and the objectives set in the company's Health and Safety Policy and Business objectives;

This policy is communicated to all employees and is available to the public.
